REASONS FOR ALLOWANCE

1. Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of claim 1, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the features in claim 1. For example, these features include the limitations that the second face of the lens body adjacent the image pickup surface is a flat Fresnel face that is substantially free of diffraction. The limitation that the Fresnel face is substantially free of diffraction overcomes the rejections based on prior art in the final rejection, paper #7. The amendment of the specification to support the limitation is accepted because of applicant's persuasive argument that the original specification has a mistranslation that would be recognized by one skilled in the art.

Claims 2-7 depend on claim 1 and are therefore allowed as well.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schaefer (3,743,385) provides another example (Figures 3-5 and 7-9) of a prior art lens that meets some, but not all, of the limitations of claim 1. For example, the lens disclosed in Schaefer does not have a face that is adjacent an image pickup surface.
